

Subject: hi

Hi Kathleen,

i would like to know that you are giving registration with out ielts requiremnts?

It was opened untill 10 of december and many of them applied for that .

Because any body can get a letter form the scool says that secondary education was in English but they all donot know how to communicate with patients or other people and all they struggle if it is any emergency situation due to lack of communication

Mnay of them are complaint says that all will affect the patient safety and all suggest to make a rule that IELTS is must and score need 7 in each module .That will be the best for nurses to practice in Australia. Otherwise all can make a certificate fro overseas says that secondary education was in English

hope this mail is effective for u to make decision and pls reply me with the current rule.

thakn u
