Subject: Regarding to English test

Dear Kathleen,

I am writing regarding to English test required from AHPRA.
Asian students also completed bachelor course with all other students from English background.
We made all uni subjects above pass without any trouble.
In addition, clinical practices have been successfully completed. Even in some hospitals where I did clinical practice, NUMs proposed me to work with them.
However, I could not accept the propose because of English test.
I believe giving qualification only due to English test result is not fair enough for overseas students.
I have not had problems communicating with other health care teams and patients.
I hope AHPRA consider that I am here to work for Australian.
I appreciate at your consideration and time consuming.

Regarding

Kyung Hee Lee, ACU student
