Subject: Draft of English skills

Dear Sir/Madam

I would like you to submit my feedback about New English skills.

The new English skills standard is not fair for every international students.

If international students study 3years in tertiary school, it is alright for them.

However, there are many international students who got credit their country (non-English speaking country). Thus they need to study only 1year or 2 years.

Studying for 1year and 2years is not enough to get sufficient English communication skills.

I hope the policy will be changed to get a license without taking the English exam if international students study more than 3years.

Thank you

Kind regards

Saya
